## PROFESSIONAL SUMMARY

Backend Software Engineer with 1.5+ years building and maintaining RESTful APIs and relational database schemas for a production SaaS platform. Skilled in API integration, query optimization, debugging/root cause analysis, and secure coding with Spring Security, within Agile, cross-functional teams and using AI-assisted tools (GitHub Copilot, ChatGPT) to boost productivity.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript

**Core CS:** Data Structures, Algorithms, Time & Space Complexity, OOP, Low Level Design

**Backend & APIs:** Spring Boot, Spring Security, REST API design & integration, Microservices Fundamentals

**Databases:** MySQL, PostgreSQL, DynamoDB, Relational Schema Design, Query Optimization

**Cloud & DevOps:** AWS Basics, Docker, Linux/Unix, Git, GitHub, Maven

**Testing & AI Tools:** Postman, Swagger, debugging & root cause analysis; GitHub Copilot / ChatGPT for productivity

**Frontend:** HTML, CSS, JavaScript

## EXPERIENCE

### SDE - 1

**Mar 2026 – Present**

*Eqsense Technologies Pvt. Ltd. (Lawcubator)*

*Bengaluru, Karnataka, India*

- Write, review, and maintain high-quality, testable backend code for a legal-tech SaaS platform used for learning and compliance workflows.
- Integrate backend services with internal systems and third-party APIs, including escalation matrix logic, reminder automation, and user credit tracking.
- Optimize SQL queries and service-layer logic, improving API response time and overall system reliability.
- Debug production issues and perform root cause analysis; apply secure coding practices with Spring Security, including input validation and access control on REST endpoints.
- Participate in low-level design discussions covering class design, API contracts, and database schema structure.
- Use Postman and Swagger to test and document REST APIs; collaborate with frontend, QA, and product teams in an Agile environment.

### Junior Backend Developer

**Nov 2024 – Mar 2026**

*Eqsense Technologies Pvt. Ltd. (Lawcubator)*

*Bengaluru, Karnataka, India*

- Developed and maintained backend services for a legal tech SaaS platform, building REST APIs for user management, course tracking, and automated reminder workflows.
- Designed and optimized relational database schemas supporting analytics and reporting features.
- Worked with senior engineers on backend performance, security, and maintainability improvements.

## PROJECTS

### Lawcubator Legal Tech Platform

- Built REST APIs for user management, course tracking, and automated reminder workflows on a production legal-tech SaaS platform.
- Designed and optimized relational schemas supporting analytics and reporting.

### EasyLearn Online Learning Platform — Java, Hibernate, MySQL

- Built a role-based learning management system supporting admin, instructor, and student workflows.
- Implemented CRUD operations and ORM mappings using Hibernate; designed database schemas and REST endpoints with a backend-focused approach.

## CERTIFICATIONS

- Full Stack Web Development Certification — Masai School ([View Certificate](#))

## EDUCATION

### Full Stack Web Development

Oct 2022 – Sept 2023

*Masai School, Bengaluru*

### Bachelor of Technology, Mechanical Engineering

Aug 2019 – Jul 2022

*Sant Gajanan Maharaj College of Engineering, Kolhapur, Maharashtra*
